

TESTIMONIAL FOR AUTHENTIC CUSTOM HOMES

I have lived in my ACH home since September, 2006 and can attest that I grow more and more content with it. Its interesting and unique design combined with all the comfort features – and the assurance that I have a quality-built home - make me feel secure and grateful. When I bought a lot at Cordillera Ranch, there were only a couple of builders whom I needed to interview before making a decision about who to entrust with the designing and building of my home. As soon as I met Israel Pena and his talented staff, I knew that I wanted a home built by ACH. I liked how carefully they listened to me, how willing they were to make adjustments in initial design renderings, and how much time they devoted to “getting it right.” Every member of the staff – Harry, Jim, Adrienne, Michelle, and, of course, Israel – treated me as if I were their most important concern whenever I met with them. My building supervisor, Ted, was superb in attending to detail and in providing follow-up. I continue to think that one of the biggest strengths of ACH is its attention to detail – both in designing and building one’s home – and in communicating with its clients in a way that seems specifically tailored to that individual. Also their follow-up is excellent. Since I’ve occupied my home, I’ve been in continuous contact with ACH—they don’t go away after closing! (and I think that’s rare in a builder).

I’m proud to live in a such a well-designed, aesthetically pleasing home—and one that is uniquely me. And I’ve received so many compliments from fellow Cordillera Ranch neighbors, many of whom live in far more expensive houses. I remember Israel’s telling me that my home was one of the smaller but more interesting homes that he’d built—and this is exactly what I wanted! Every time I round the curve and drive up my driveway, I feel happy to be returning to my beautiful home.
